Meet Ganes..

Ganes Kesari is an AI thought leader, TEDx speaker, and Forbes contributor. He is the co-founder and Chief Decision Scientist at Gramener, a 250-member data science company. He founded Innovation Titan, a data analytics advisory & thought leadership firm.

Ganes runs executive workshops for global organizations on business transformation using data analytics and AI. He keynotes conferences and delivers guest lectures at schools such as Princeton University & Penn State University. Learn more about him [here](#).

His Primary Audience..

• C-Suite leaders such as CEOs, CIOs, and CDAOs

• Executives at organizations and non-profits

• Startup Founders

Some Popular Topics..

• How to transform organizations with data-inspired leadership

• Data Storytelling: The key to actionable organizational decisions

• The 3 emerging roles that will shape the future of AI

Offerings..

- Keynote Address
- Executive Workshops
- Corporate Training

His EPIC Methodology..

- **Experiential:** Business examples to bring the concepts to life
- **Practical:** Proven industry frameworks that are actionable
- **Innovative:** Latest, novel content to help challenge the status quo
- **Concise:** Concepts presented in a simple & easy-to-understand way

Ganes employs humor and a conversational style to engage the audience. He gamifies all sessions to help them connect with the content.

What The Audience Says..

"... As I watched Ganes's TEDx talk unfold live, his speaking stood out to me. He shocked the audience with stunning imagery. He used humor to lighten a heavy and serious topic...."

- Jake Voorhees, TEDxWilmington

"...his delivery style was so engaging — he brought energy, humor and personality to the topic..."

- Rob Biesenbach, Comm. Consultant
